DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claim 23** is rejected under 35 U.S.C. 102(e) as being anticipated by Gomez (US 6,583,675).

Regarding claim 23, Gomez discloses the followings:

“A method of operating a charge-pump phase-locked loop having a voltage controlled oscillator including a varactor having a first set of capacitor cells configured to adjust a capacitance based on a first control voltage, and a second set of capacitor cells configured to adjust a capacitance based on a second control voltage” (Fig. 2, elements 228, 234; col. 2, lines 13-27; col. 5, line 31-67; Fig. 3, lines 18-55; wherein element 234 teaches the claimed “first set of capacitor” and multiple capacitor 232a-n teaches the claimed “second set of capacitor”);

“receiving a first and second update signal each having at least one state based on a phase difference between a first clock and a second clock” (Fig. 2, element 203; 202);

Art Unit: 2611

"providing the first control voltage having a level substantially proportional to the phase difference" (Fig. 2, element 209; col. 6, lines 10-19, 30-32);

"providing the second control voltage having a level substantially proportional to an integral of the phase difference" (Fig. 2, element 211; col. 6, lines 20-40).

Allowable Subject Matter

3. Claims 1-22 are allowed.
4. Claims 24-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pham (US 6,952,124) discloses Phase Locked Loop Circuit With Self Adjusted Tuning.

Smith et al. (US 6,016,332) discloses Method And Apparatus For Effecting Analog Phase-Locked Loop Control Of A Signal Frequency.
